PROFILE SUMMARY

Data Analyst with 2+ years of experience in customer, sales, campaign, and operational analytics, KPI reporting, dashboard development, data validation, and performance analysis. Advanced Excel user with hands-on experience in Pivot Tables, XLOOKUP/VLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, Power Query, VBA/Macros, Data Validation, Conditional Formatting, and dashboard automation. Strong experience with SQL, including advanced joins and CTEs, Power BI, DAX, Power Automate, SAP, Oracle, Tableau, and CRM data. Experienced in building MIS and management reports, transforming and reconciling data, automating repetitive reporting workflows, maintaining 99%+ data accuracy, and communicating insights to cross-functional stakeholders. Based in Dubai and available for immediate joining.

PROFESSIONAL EXPERIENCE

Data Analyst cum Sales Executive

Mar 2026 – Present

Al Areej General Trading LLC, Dubai, UAE

- Analyzed customer, sales, and campaign data across CRM systems for 15+ business clients, tracking pipeline performance to support forecasting, ROI analysis, and business decisions.
- Generated 100+ qualified leads through targeted outreach, networking, and referrals, contributing to a 100% increase in the active pipeline.
- Maintained 99% data accuracy, consistency, and integrity across CRM lead, opportunity, and client-interaction records.
- Managed end-to-end customer engagement from prospecting and demonstrations through negotiation and closing, achieving 100% client retention.

Junior Data Analyst

Feb 2025 – Jan 2026

Mykare Health

- Collected, transformed, validated, and analyzed operational, customer, and performance data from multiple sources, delivering 100+ recurring MIS/management reports and Power BI dashboards for KPI and trend tracking.
- Built reporting solutions using Pivot Tables, XLOOKUP/VLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, **Power Query**, **VBA/Macros**, Data Validation, Conditional Formatting, and dashboard automation.
- Wrote advanced SQL using **JOINS**, **CTEs**, **filtering**, **aggregations**, and **data transformations**; worked with **Oracle**, **SAP**, **CRM**, and other business systems for extraction, validation, reconciliation, and reporting.
- Developed **Power BI dashboards**, **DAX measures** and **data models** for KPI tracking, performance analysis, trends, and management reporting; automated repetitive workflows using **Power Automate** and **VBA/Macros**.
- Processed 50+ records weekly with **99% accuracy**, redesigned version-controlled filing systems reducing retrieval time by **50%**, and coordinated reporting requirements/data-driven insights with **20+ stakeholders** while maintaining customer and financial data confidentiality.

Intern Data Analyst

Jul 2024 – Oct 2024

Idatalytics

- Entered and validated 100+ sales, customer, and purchase records in database and CRM systems with 100% accuracy.
- Generated 50+ MIS reports and dashboards using Excel and Power BI, applying Pivot Tables and Power Query to surface business insights.
- Redesigned digital and physical document-control processes using standardized, version-controlled practices, reducing filing errors.
